	Urgent	Not Urgent
Important	Do — Your MVP	Schedule — For V2.0+
	- Add assignments with a name, course, and due date.	- Add priority levels (high, medium, low).
	- View assignments sorted by due date.	- Generate weekly summaries of completed and pending assignments.
	- Mark assignments as completed and save data to a file.	- Filter assignments by course or completion status.
Not Important	Delegate — Use a library	Delete — Cut it
	- Use Java's built-in date and time classes to handle due dates.	- Add AI to automatically plan a student's schedule.
	- Use Java's built-in file-handling tools to save and load assignments.	- Build a graphical user interface with animations and custom themes.
	- Use a standard Java sorting utility to order assignments by deadline.	- Add social features to share assignments and compete with friends.
